EDUCATION

Brigham Young University

April 2028

Bachelor of Science: Machine Learning

Provo, UT

Minor in Business

- GPA 3.71
- Active member engaged in technical workshops, speaker events, and collaborative projects focused on machine learning applications, model development, and emerging AI technologies.
- Designed and built a full-stack movie review web application using Python, SQL, JavaScript, and React, featuring user authentication, rating systems, data ingestion pipelines, and a relational database to support scalable user interaction.

Achievements

- Full-Stack Web Development Certification (Bottega University)
- Employee of the Month at Cotiviti
- Academic All-State (2020)
- Designed and implemented a new internal workflow that reduced team workload and improved operational efficiency.

EXPERIENCE

Cotiviti

March 2023-Present

Sr Support Analyst

South Jordan, UT

- Resolve many complex client support cases per week, analyzing healthcare claims data and system logic to identify root causes, reducing repeat issues and improving client satisfaction scores
- Collaborated with engineering, product, and QA teams to troubleshoot defects and data discrepancies, contributing to faster resolution times and improved system reliability across multiple enterprise clients
- Developed internal documentation and process improvements that standardized troubleshooting workflows and onboarding for new analysts, increasing team efficiency and reducing average case handling time.

Allied Universal

March 2022-March 2023

Security Professional

Eagle Mountain, Utah

- Monitored and controlled access at the Meta Facebook Data Center.
- Verifying credentials and enforcing security protocols to protect personnel, infrastructure, and sensitive assets.

VOLUNTEER EXPERIENCE

Cedar Hills Golf Club

Jun 2022 - Oct 2024

Cart Puller

Cedar Hills, Utah

- Volunteered to support daily operations by preparing and staging all golf carts before opening when the course lacked staffing resources.
- Assisted with tournament operations by setting up the course according to Cedar Hills tournament formats, ensuring readiness and smooth execution on event days.

SKILLS

Proficient- Oracle SQL (complex queries, joins, and data analysis)

Moderate- Python (data analysis, scripting, automation)

Beginner- C++ (coursework at BYU)
